2. Solution
Toshiba automated solutions

- Easily **transform** from manual **to automatic labelling**.

- **Plug & Play:** No development or integration cost as it can be integrated into almost any production line using manual labelling.

- Off the shelf standard solution, quick & easy to install.

- **Low-cost automatic application solution** that works hassle-free with Toshiba industrial printers.

- Ideal solution for production lines with outputs of up to **1.800 products per hour** (print & apply up to 30 labels/min).

3. Benefits & results
Toshiba automated solutions

3SP 👍

- **Process & productivity improvement –** Eliminate manual labeling processes (up to 3,5 times faster).

- **Production time & cost reductions** by automating.

- **Easy installation & integration** into existing production lines (3 hours).

- **Simple to do** a quick proof of concept.

- **Reduce your investment cost by up to 50%** compared to a specifically customised complex automatic print system.

- **Insured investment –** Today's standard industrial printers can be transformed in the future with APLEX4 into an automatic labelling system.

- **Scalable solution –** Add **RFID** printing and encoding if needed.
